We appreciate you trusting us to train your officers. We do not take this lightly and are committed to providing your staff with the highest quality training possible. *****Have the recruit scan this QR code ASAP for us to start the training process.*****

***PLEASE READ CAREFULLY**

*We have changed the **pre-PT test**. Pre-PT tests will now be administered on select dates listed below **before** the start of the Academy. This means that we will no longer offer a pre-PT test on the first day of the Academy unless there are extenuating circumstances. Before administering the pre-PT test, the recruit's application with the included physician's approval **must** be turned in.

The initial pre-PT test dates will be March 4, 2025 and March 18, 2025. A remedial date will be provided on March 25, 2025, for those who failed and would like another chance to pass. All pre-PT tests will be conducted at 9:00 am at the MLEOTA gym.

Officers must score a minimum of 50% before being allowed admittance to the Academy. If a student fails any portion, they will be given the results along with a program for

improvement. Our assessment of the fitness level of the officer and your encouragement will provide the ingredients to have them ready to meet the program's challenges.

COURSE TUITION AND EXPENSES

*Basic class training is \$4,000 for eleven (11) weeks (480 training hours) and prorated for those individuals who do not complete the entire 11-week course.

**Tactical Driver Training for the Basic Class.* A vehicle will be required for this training. We request that all wheel covers be removed and the vehicle be equipped with a spare tire and jack. Our Academy will not furnish oil, transmission fluid, or engine coolant. A large portion of this training will be devoted to Emergency Vehicle Response and Pursuit Driving. Sirens and Blue lights will be required for this training.

**Firearms training.* The firearms curriculum consists of 52 hours of firearms training. The number of students training with a semi-automatic pistol has continued to increase. Additionally, our curriculum has evolved to reflect the training needs of modern policing. A basic recruit will now fire at least 1250 rounds and use several more targets than before. These changes will require a slight increase in the differential ammunition cost if the student uses a semi-auto pistol during training. We furnish all semi-autos with ammunition. The cost differential for training with a semi-auto will be as follows:

- We can bill your agency.
- Your agency may send a check.
- Your agency may provide ammo.

9mm \$ 260.00

45 Cal \$288.00

40 Cal \$252.00

If we can assist you in any way or answer any questions, please do not hesitate to call.

PEACE OFFICER STANDARDS & TRAINING

Full-Time Basic/ Part Time Basic/ Refresher Training Packet

Dear Law Enforcement Administrator and Examining Physician:

This training packet contains a medical evaluation, a reimbursement supplement, and an application for enrollment to the Academy. Please complete all forms in accordance with the instructions below. Submit the completed packet (pages 1 - 11) to the Academy at least one week prior to attending a training course, (forms that have been completed six months or more prior to training cannot be accepted). With an increased awareness of the importance of physical fitness in the law enforcement profession, as well as in the overall maintenance of quality of life, the Board on Law Enforcement Officer Standards and Training (BLEOST) has enhanced fitness standards for law enforcement candidates. Students will be participating in vigorous physical fitness training and defensive tactics, as well as stress-related training (physical and mental), in such areas as driving, firearms and officer survival. Driving and firing events incorporate seasonal inclement weather with day and night sessions to further enhance stress-related training.

This medical examination report should provide an adequate evaluation of the physical condition of a law enforcement candidate and identify potential problem areas in each candidate's ability to successfully complete training. Agencies are urged to carefully consider any decision to enroll a student in training who has a potential problem. Students with weight problems, who have not been active in a physical fitness program or who have some medical difficulty, will have a greater probability of not completing the course. If possible, fitness levels should be at or above the minimum levels established in this packet prior to attending the basic course. The procedures for completing these forms are as follows:

Information for the Physician - Continued

Physical Fitness Requirements

The Board on Law Enforcement Officer Standards and Training (BLEOST), in recognizing the importance of physical fitness for academy performance and subsequent job performance, has established physical fitness training standards that must be achieved to successfully complete the training program. The board has established a test that effectively measures cardiovascular endurance and strength. An additional component of fitness, body weight and composition (% of body fat), has a great impact on the examinee's ability to perform the other tests. The evaluation of the candidate's fitness begins with a physician's examination and a determination of the ratio of fat to lean tissue. If an individual's weight exceeds the threshold weight, then a skinfolds caliper measurement should be taken to determine body fat percentage.

The BLEOST will require all board-approved training academies to administer an entry physical fitness test for those students reporting to the training program. The test will be given immediately upon reporting for training and will determine whether a student can remain in the program. This test is an eligibility requirement. A passing score of 50% must be achieved. Those students who fail the test must leave the Academy. They may, however, resubmit their application to attend a future training class.

The test is comprised of three components: agility run, push-ups, and a 1½ mile run and is administered to all Full-time, Part-time, and Refresher trainees. It is the same test administered at the end of the program for Full-time and Part-time trainees (Refresher trainees are not required to take the final test) with one exception: The entry test requires 50% to pass while the final test requires 70%. This requirement does not relieve students from participating in P.T. training once they pass the entry requirement. Full time and Part-time trainees will continue to participate in scheduled P.T. training and must also pass a final P.T. test with a minimum score of 70% to graduate.

Physical fitness can only be achieved over time. It requires a commitment to regular exercise and good eating habits. Thus, it is important to disseminate this information so that all impacted personnel can prepare ahead of time. Scores needed to enter training and to graduate are as follows:
